# Rota Flow

Nogueira Fertilizer and Distributor Rota Flow is recognized in its class as the most efficient and accurate system.

Rota Flow system is an exclusive system that allows the fertilizer or the seed to reach the throwing disc without suffering impact or blow. Fertilizer or seeds slides on the system and is thrown in a smooth and precise way to the blades avoiding defragmentation of the particles.

Its system is easy to calibrate and once the calibration is done, according to the operation manual, the application in a width of 24 m is uniform and precise. The opening of the discharge gates is with hydraulic control that guarantees precision and speed in the operation.

Its tank is produced with high quality polyethylene that guarantees a longer life and resistance to work, as well as its metallic structure in high quality steel is developed to withstand its capacity of 1500 liters.

### Technical Characteristics

Production	from 50 to 2000 kg/ha
Required revolution at PTO	50 hp
Required power at PTO	540 RPM
Loading capacity	600 lt
Working width	from 9 to 14 m
Length	1,50 m
Width	1,70 m
Height	1,33 m
Weight	139 kg
