

# PTO-Driven Livestock Division

## Forage harvester

# FTN 1000 S

Sugarcane has been an important source of food for livestock and to meet this demand the engineering team of Nogueira continues to develop new technologies.

The innovative FTN 1000 S Forage Harvester arrives on the world market with a new and special cutting front in total area.

FTN 1000 S Forage Harvester is essential for harvesting sugarcane and tall grasses as its system allows precise cutting of the stalk, facilitating regrowth!

### Technical Characteristics

Production	till 38 t/h
Cut sizes	12 (from 2,5 to 18 mm)
Number of rotor	1
Number of drums	2
Number of blades	14
Number of gathering drums	4
Power source	tractor PTO
Required power at PTO	from 80 to 120 hp
Required revolution at PTO	540 RPM
Transmission system	gearbox
Weight	1072 kg
