

# ROTA FLOW 1500

## Fertilizers and Distributors

Rota Flow is one of Nogueira's most efficient and accurate systems.

Rota Flow system is an exclusive system that allows the fertilizer or the seed to reach the throwing disc without suffering impact or blow. Fertilizer or seeds slides on the system and is thrown in a smooth and precise way to the blades avoiding defragmentation of the particles.

Its system is easy to calibrate and once the calibration is done, according to the operation manual, the application in a width of 24 m is uniform and precise. Discharge gates are controlled hydraulically, ensuring speed and precision. Its tank is produced with high-quality polyethylene that guarantees a longer life and resistance to work, as well as its metallic structure in high-quality steel developed to withstand its capacity of 1500 liters.

Technical Features	ROTA FLOW 500
Working width	9 up to 24 m
Production	2 up to 1007 kg/ha
Required revolution at PTO	540 rpm
Required power at PTO	From 50 hp
Loading capacity	1.500 lt
Weight	423 kg
Height	2,2 m
Width	1,4 m
Height	1,52 m
